

Temuujin (Temo) Batbold

Senior Product Designer / Design Lead — Web3 & Fintech · Remote (EU / US Pacific / SEA)

Portfolio: temode.art (case studies) · hello@temode.art · linkedin.com/in/temodeart

OVERVIEW

Crypto-native product designer with 7+ years in fintech and 2+ years designing full-time for Web3 — governance analytics, on-chain data products, and DAO tooling for protocols including Uniswap, Arbitrum, Optimism, Polygon, Sky/MakerDAO, and Hedera. I take data-heavy products from 0→1 to multi-product design systems, shipping fast in small, fully remote, cross-timezone teams (US Pacific / EU / SEA), with deep roots in payment, onboarding, and wallet flows at superapp scale (500k MAU).

EXPERIENCE

Lifotech Ti Mongolia — Senior Product Designer

Tino SuperApp (2nd-largest superapp in Mongolia, 500k MAU) · Ulaanbaatar, Mongolia · June 2026 – Present

- Designing for **Tino**, Mongolia's second-largest superapp at **500k MAU**, across payments, ride hailing, and daily-use services for a mass-market consumer audience.
- Reworked the ride-hailing booking flow end-to-end, lifting daily successful trips from **300 to 2,000** (6.7×).
- Partnering with PM and engineering on discovery, specs, and release QA, driving system consistency across the app's multi-service surface.

StableLab — Design Lead

Web3 governance & analytics · Remote (US Pacific / EU / SEA) · February 2024 – February 2026

- Led end-to-end product design for **Forse Insights**, scaling from 1 protocol to 10+ major protocols (Arbitrum STIP → Uniswap, Polygon, PayPal, Sky/MakerDAO, Optimism, Rootstock, Hedera) and shipping 30+ dashboards turning complex on-chain data into decision-ready insights.
- Built and owned the core design system + data-viz library (tokens, components, chart patterns, interaction rules), cutting dashboard delivery from ~5 days to ~3 days (40% faster) with consistent UX across products.
- Defined interaction and visualization standards through user research with DAO delegates and protocol operators plus competitive analysis of analytics tools, improving trust and clarity in high-stakes governance workflows.
- Joined as the first and sole designer; promoted to Design Lead, owning product UX, design systems, and brand direction across the company while collaborating async across US, EU, and SEA time zones.

MongolID — Design Lead

Digital identity & merchant fintech · Ulaanbaatar, Mongolia · July 2023 – January 2024

- Led the redesign of **Minu**, a merchant-facing POS and analytics app used by ~200k merchants, covering payments, insights, and operational workflows.
- Introduced a company-wide design system unifying current and future products, cutting release cycles ~2 months → ~1 month.
- Designed an SSO platform for smoother onboarding and account reuse across products, growing new-user signups 7.5× (~200 → ~1,500 new users/month).

HiPay — Senior Product Designer

Payments superapp · Ulaanbaatar, Mongolia · May 2019 – July 2023

- Led the major redesign of HiPay SuperApp (v3), scaling monthly active users from 120k to 300k.
- Redesigned high-frequency payment and recharge flows, increasing active payers by 50% and reducing friction in daily transactions.
- Built and maintained a cross-functional design system used by designers and engineers, improving delivery speed and product consistency.

ACHIEVEMENTS

- Winner — “Future of Digi Pay” Hackathon by Khan Bank** (Team Flow, Oct 2025): 1st place of 60+ teams for a UX + prototype converting everyday spending into automated micro-savings; invited for further development by the Digi Pay team.
- ETHGlobal Bangkok 2024** (Nov 2024): designed product UX/UI and demo story for **ChallengeMe** — challenge creation, proof submission, and crypto betting among friends; earned ~\$5k in prizes.
- Best Digital Wallet in Central Asia 2023** (Global Banking & Finance Review): awarded to HiPay following the SuperApp v3 redesign.

CORE EXPERTISE & TOOLS

Web3 / crypto UX: governance & DAO tooling, on-chain analytics, wallets, protocol dashboards, crypto payment flows

Fintech & data-heavy UX: onboarding, KYC, payments, settlement, account management · dashboards, filters, cohorts, segmentation, KPI storytelling

Design systems & execution: tokens, components, documentation, dev handoff + QA · discovery → specs → ship

Tools: Figma, FigJam, Adobe CC, Spline, Rive, Lottie, Miro, Linear, ClickUp, Slack, Notion
